

1-Defect occurred during medical care pathway for the patient this means:

- 1- variance
- 2- defect
- 3- medical error
- 4- sentinel event

33-Failure occurred in a certain department and the HCQP manage the problem to prevent recurrence , this example of:

- A. RCA
- B. FMEA
- C. flow chart
- D. PDCA

MOHAMED ELDIB

**3-The following is important in development of practice guidelines except:**

- A. Evidence based researches
- B. Experience of peers
- C. Patient expectation
- D. Clinical knowledge of peer physician

**4-Deviation from clinical pathway, What to call these complications:**

- A. Variance
- B. Modification
- C. Change
- D. Trend

MOHAMED ELDIB

5-Failure to schedule a surgical date for the patient is considered:

- A. Overuse
- B. Underuse
- C. Misuse
- D. Appropriate use

6-The organization decided to inter new clinical guideline for ttt of heart faliure. what should be done to get cooperation from physicians. what should Cphq do ?

- 1\_Hire cardiologist
- 2-involve physicians.
- 3- discuss with department head to get action

7-The fact that many scientifically sound practices are not used as often they should be is an example of:

- A. Abuse .
- B. Misuse .
- C. Underuse .
- D. Overuse

محمد الديب كاتب مسؤول  
الحاجة موجودة و الناس مش بتستخدمها و دة التعريف الأمثل لل underuse

أعجبنى رد 3 أ

8-Which of the following is the primary goal of risk management?

- A. Identify the high risk areas of the organization.
- B. Maintain an effective incident reporting system.
- C. Perform failure mode and effects analyses.
- D. Reduce financial loss associated with legal actions

محمد الديب كاتب مسؤول  
لو قالك فى سؤال زى دة ايه هى ال first step of risk management من غير ما تفكر تختار ال identify risk انما لما يقولك ال goal يبقى على تفكر فى كلمة reduce harm سواء clinical او financial و خليك فاكر انه reduce مش eliminate علشان كدة الاجابة D

أعجبنى رد 3 أ

محمد الديب كاتب مسؤول  
(1)To identify and mange risks.  
(2)To prevent or minimize risk of harm to patients , visitors , healthcare professional and staff .  
(3) To identify opportunities for improvement.  
(4)Reducing not eliminating potential financial loss

## 9-Which of the following is the primary goal of risk management?

- A. Identify and manage risks to promote patient safety
- B. Maintain an effective incident reporting system.
- C. Perform failure mode and effects analyses.
- D. Eliminate financial loss associated with legal action

محمد الديب كاتب مسؤول

خد بالك ليه هنا اختار identify risk والسؤال التانى لأ علشان هنا هو بعد ما عمل risk identification خد أكشن عليها و بالتالى هى الأصوب

علشان كدة الاجابة هنا A

أعجبنى رد 3 أ

## 10-What is a term applied when the proper clinical care process is not executed appropriately, such as giving the wrong drug to a patient or incorrectly administering the correct drug?

- A. Medication overuse .
- B. Medication underuse.
- C. Medication error .
- D. Illegal use.

MOHAMED ELDIB

## 11-As CPHQ assign to assess new process for potential failures he should:

- a. RCA
- b. FMEA
- c. Flow chart
- d. PDCA

محمد الديب كاتب مسؤول قاعدة

ال new process بنعملها FMEA الى هيا ال failure mode and effect analysis و دى هنعمل تريكاتها بعدين فى شايترو  
انما ال RCA بستخدمها لما تكون فيه مشكلة حصلت فعلا و انا عاوز اشتغل عليها و اقلل حدوثها تانى

RCA is retrospective  
FMEA is proactive

كمان مشروع التحسين بيكون على مشكلة حصلت و قائمة و بحسنها  
علشان كدة الاجابة B

أعجبنى رد 3 أ

## 12-Occurrence reporting" is a type of:

- a. risk reduction
- b. risk evaluation
- c. risk identification
- d. risk prevention

محمد الديب كاتب مسؤول

اول خطوة من خطوات ال risk management هى ال risk identification و دى بتتعمل من كذا حاجة منها

1-pt complain  
2- patient satisfaction survey  
3-staff interview

و من اهمهم و من ضمن ال routine work يتاعنا ال OVR ليه لان انا من خلاله بقدر احدد لسته المخاطر و المشاكل المحتملة و احطها حلول و اضيفها الى risk index  
علشان الاجابة risk identification

أعجبنى رد 3 أ

**13-Evaluating medication administration to reduce medical errors is an example of:**

- A. quality management.
- B. resource management
- C. risk management.

**14-Effectiveness of performance improvement program best assessed by:**

- A) patient satisfaction
- B) staff competencies
- C) guideline compliances
- D) organizational culture

MOHAMED ELDIB

15-..... is a term applied when the proper clinical care process is not executed appropriately, such as giving the wrong drug to a patient or incorrectly administering the correct drug.

- A. Underuse
- B. Overuse
- C. Misuse
- D. Illegal use

16-In a culture of patient safety, the most appropriate surveillance to assess the infection rate within the hospital is:

- A. Total house surveillance
- B. Targeted surveillance
- C. Community surveillance
- D. Prioritized surveillance

MOHAMED ELDIB

17-Which of the following is not one of the types of quality problems identified by the IOM's national round table on Healthcare quality?

- A. Misuse
- B. Abuse
- C. Overuse
- D. Underuse

18-The bed utilization is determined mainly by:

- A. Financial and resources loss
- B. Misuse, errors, abuse
- C. Overuse, abuse and misuse
- D. Overuse, underuse and misuse

MOHAMED ELDIB

محمد الديب كاتب مسؤول  
الراجل سأل سؤال بدائي جدا مش محتاج تفكير عميق يقول استغلال الأسرة في المستشفى بيتحدد او يتقيم ازاي ببساطة يا اما استغلال قليل او زيادة عن اللازم او كويس يعنى لو نفتكر فى المحاضرة و احنا بنقول عيه هى ال utilization problem و قلنا 3 انواع الى هما فى الاجابة D

أعجبنى رد 3 أ

19-Medication administration to reduce medical errors is an example of:

- A. quality management .
- B. resource management .
- C. risk management .
- D. financial management

20-The primary goal of a program to assist with appropriate antibiotic selection and dosing is to:

- A. minimize adverse events .
- B. reduce cost .
- C. prevent the misuse and overuse of antibiotics .
- D. reduce the average length of stay.

21-Standards of care based on the knowledge and research of recognized experts are known as:

- A. benchmarking.
- B. generic screening.
- C. pre-established criteria.
- D. evidence-based guidelines.

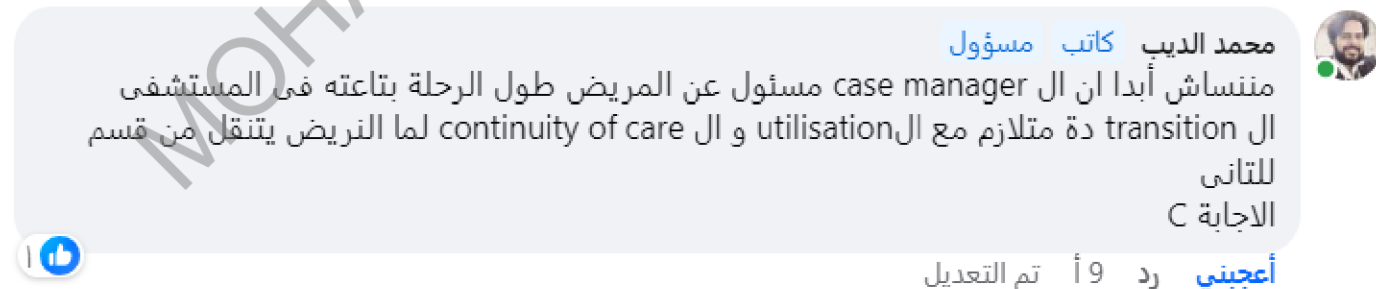

22-patient discharged without any counselling of his care, this problem, concerned with:

- A-medical coverage
- B- transition care
- C-case management
- D-reconciliation

محمد الديب **كاتب** **مسؤول**

مننشاش أبدا ان ال case manager مسئول عن المريض طول الرحلة بتاعته فى المستشفى ال transition دة متلازم مع ال utilisation و ال continuity of care لما المريض يتنقل من قسم للتانى الاجابة C

أعجبني رد 9 أ تم التعديل

23-A complete episode of care that starts at a patient admission and followed up till the time of discharge may be described as a/an:

- a) case management. (coordination of care)
- b) disease management.
- c) inpatient care.
- d) clinical pathway

محمد الديب كاتب مسؤول  
السؤال ببساطة عن الفترة نفسها من بداية دخول المريض للمستشفى الى خروجه منها يعنى عاوز  
يسأل دة inpatient و لا outpatient  
انما ال case management دة job description  
كمان ال disease management دة طبعا جزء من ال population health و clinical pathway دة  
طبعا roadmap الى هعالج بيه المريض  
علشان كدة الاجابة C

أعجبنى رد 3

24-Which of the following describes the incorrect administration of a drug to a patient ?

- A. Overuse
- B. Underuse
- C. Misuse
- D. Illegal use

MOHAMED ELDIB

## 25-The use of clinical pathways and guidelines in hospitals should:

- A. minimize variation in patient care .
- B. reduce length of stay.
- C. improve patient satisfaction .
- D. identify errors in patient care

## 26-After significant unexpected event, an intensive analysis is performed to:

- A. Understand the cause
- B. Correct risk management data
- C. Prevent the facility from law suit
- D. Identify who made the error

محمد الديب كاتب مسؤول

ال intensive analysis بيتعمل لو عندي مشكلة كبيرة و محتاج اقف وقفة و اعمل RCA علشان اعرف الاسباب زى بالطب ال sentinel event يعنى هنا المشكلة قائمة و محتاج اعرف الاسباب.

علشان كدة الاجابة A

MOHAMED ELDIB

## 27-the patient didn't receive sufficient counselling in his case this is:

1. Case management
2. Care transition

## 28-The primary purpose of risk management trend analysis is to:

- A. meet regulatory requirements.
- B. provide required reports to liability carriers.
- C. identify opportunities for improvements.
- D. eliminate financial loss for organizations

محمد الديب كاتب مسؤول

احنا قلنا فى المحاضرة اننا فى ال risk management مش بنعمل eliminate لاي حاجة احنا الجيم كله reduction تقليل الخسائر انا ال تحليل الى بيحصل للبيانات بيساعدنى فى رصد ندفرض التحسين فى المستشفى  
علاشان كدة الاجابة C

أعجبنى رد 3

## 29-The optimal sequencing and timing of intervention best describes:

- A. Audit
- B. Clinical pathway
- C. diagnosis related groups
- D. Utilization review

## 30- Role of CPHQ in clinical pathway :

- A- build up pathway
- B- collect data and research
- C- compare outcome to benchmark
- D- compliance pathway

MOHAMED ELDIB

محمد الديب كاتب مسؤول

خلينا نتفق ان المقارنه مهمه جدا لكن هتقارن ازاى من غير داتا يبقى اولاً لازم تكون فيه عندنا ارقام و بعدين ابدأ اقرن يبقى الأول collect data علشان الاجابة B

أعجبنى رد 3

### 31-which is the best tool used in "generic screening?"

- a. medical record
- b. claims data
- c. incident report
- d. performance indicators

محمد الديب كاتب مسؤول

Generic screening (using medical record)

- Concurrently screen every patient hospitalization , ambulatory service or home care.
- It is an example of 100% review process.
- It is both risk management and quality improvement tool used to collect data for occurrence reporting.

incidents reporting :

Are notification for adverse patient occurrence (APOs) &potentially compensable event (PCE).

Patient safety data screening :

- Screening hospital computerized data using key patient safety indicators through the use of free software commission by AHRQ.

### 32-Which best to include in clinical risk management:

- A. control adverse events
- B. depend on patient acuity
- C. promotes patient safety
- D. requires risk manager

محمد الديب كاتب مسؤول

الراجل بكل بساطة قال clinical risk management يعنى مربوط بالمرضى

فى A ال adverse event يحتمل يكون clinical or non clinical

فى B انه يعتمد على حالة المرضى و دة سطحى جدا لان مش لازم المريض يكون تعبان جزا

علشان ادور على ال safety بتاعته

فى C دعم سلامة المرضى بكل تفاصيلها

فى D يحتاج لمدير ادارة مخاطر

علشان كدة الأفضل و الأقرب و الأشمل هى C

أعجبنى رد 9 أ

### 33-difference between practice guidelines and clinical pathways is:

- A. Guidelines are recommendations and pathways are evidence based .
- B. guidelines deal with one disease process and pathways deal with multiple.
- C. pathways deal with multiple steps and processes and practices deal with one practice.
- D. Practices deal with quality and pathways deal with safety

محمد الديب كاتب مسؤول

هنا السؤال الهدف منه الفهم ببسأل عن الفرق بين ال guideline و pathway  
كلنا متفقين ان ال guidelines عبارة عن evidence based practice و مبنى على أساس علمى انما  
ال pathway عبارة عن عدة خطوات يوصى بها تمثل ال road map الى هشتغل بيها علشان نقلل  
ال variation فى ال practice بين الستاف نشوف الاجابات  
فى A بيقول ان ال guideline. عبارة عن recommendation و دة غلط  
فى B بيقول ان ال guideline بيتعامل مع مرض واحد انما ال pathway بيتعامل مع اكثر من مرض  
و دة مش صحيح لان ال pathway بيتعامل مع multiple steps علشان يكون بمثابة ال  
management plan لمرض واحد  
فى D بيقول ان ال CPG بيتعامل مع ال quality و ال pathway مع ال safety و دة كلام عايم مش  
موضح فرق بينهم  
انما فى C بيقول ان pathway بيتعامل مع multiple steps و ال guideline مع practice واحد او  
التعامل مع مرض معين و دة الأصوب  
علشان كدة الاجابة C

**34-Healthcare professional is informed that an error resulting in patient harm, what he will do:**

- A-Pareto
- B-RCA
- C-FMEA

**35-The use of clinical pathways and guidelines in hospitals should do which of the following?**

- a. Minimize variation in patient care
- b. Reduce length of stay
- c. Improve patient satisfaction
- d. Identify errors in patient care

MOHAMED ELDIB

### 36-Defect occurred during medical care pathway for the patient this means:

- 1- variance
- 2- defect
- 3- medical error
- 4- sentinel event

### 37-pathway is:

- 1-accountable care
- 2-limited to one patient setting
- 3-using value stream map
- 4-used to reduce variation

MOHAMED ELDIB
